Deep Cleaning Power

Features 650 RPM cylindrical brushes that run at speeds up to four times greater than comparable disk scrubbers, reaching down into cracks and crevices to clean dirt and debris that pads just pass over.

Versatility

Clean virtually any hard or soft surface, including hard, uneven floors like tile, textured LVT and concrete, soft floors like rubber sports mats, entrance mats and commercial carpet, and even escalators!

One-Pass Cleaning

This low-moisture machine simultaneously sprays solution on the floor, scrubs with counter-rotating brushes, and lifts dirt and water onto a recovery drum, leaving floors clean and dry in no time.

Low-Profile Design

The compact design allows the Vortex to clean hard-to-reach areas in kitchens, bathrooms and other tight spaces a standard scrubber just can't fit.
